Description

Our revolutionary new troop seat is based on our accumulated experience in supplying energy absorbing systems. We implemented a highly innovative approach to design, used our vast experience and paid attention to every detail of our system; from each axis and lock to the energy absorbing mechanism, from ergonomics to safety. Every element has been designed to provide the highest quality seat. The result is state of the art leading energy absorbing seats that meet highly demanding conditions with top ergonomic qualities.

Our troop seat is the chosen solution by leading platform manufacturers from the US, Israel and Europe.
